MESSAGE OR INSTRUCTIONS:

For your information the following is our delivery summary for the time frame when water was delivered from Harlan Co releases one day after Brad shut us off on the 30th. I called this water that was delivered from Harlan even though Harlan had been shut off for some time. It is my opinion it was effecting our diversions up to this time frame. You may notice we diverted 7,722 at the state line and delivered 3,023 to the fields for a 39% delivery percentage. What this doesn't show is how much did we actually release from Harlan County. Will you please provide me with that information. When we conduct a crop census this fall we will come up with the actually irrigated acres. That 4" mark is going to be very close. With the shot of river water we received pre Harlan County and with this one we are now receiving post Harlan County, we are producing a lot of additional bushels.

Kenny
